Ireland Inside Track Program
Summer 2019
August 10-18

Program Description

The Ireland Inside Track Program is an eight-day immersion program designed to provide Notre Dame undergraduate students with insight and access to Irish society, culture and economy. Undergraduate students from Notre Dame will travel to Ireland to interact with influential Irish leaders, entrepreneurs, politicians, and artists; they will have the opportunity to visit European headquarters of major tech companies, visit the parliaments of two countries and gain a real insight into Ireland's position within the European Union and the modern global economy.

They will also be introduced to the magnificent Irish landscape and partake in Irish cuisine and cultural activities, such as the uniquely Irish sport of Hurling. The “Inside Track” course was created to ensure that highly motivated students will not be passive tourists but engaged pilgrims who will experience Ireland in a genuine way, and absorb an authentic experience of contemporary Ireland.
